

X-PLAN 620F

X-PLAN 520F

X-PLAN 460F (same device length as the 360C+/360CII+)

X-PLAN 380F (same measuring width as the 360C+/360CII+)

X-PLAN 300F

Detachable Printer (option)

Detach the mini-printer 16c so as to connect the PC interfacing cable with the X-PLAN. Interfacing cables to communicate with any computer are available in lengths of 2m, 5m and 10m.

USHIKATA's Unique Design

●Printer Buffer

The X-PLAN's can perform measurements without the attachment of a printer, but the use of the mini-printer 16c during measurements makes the unit even more effective. The buffer function pools data before printing, thus eliminating interruptions during consecutive measurements.

The F series offer all of the functions provided with the X-PLAN360C+ and 360CII+, and even more.
